Sockets/ Ratchet
19mm Socket
18mm Socket

JEEP WRANGLER REAR SEAT RECLINE KIT INSTALLATION GUIDE

This kit provides everything you need to modify the rear seat of your Jeep Wrangler JKU into a more comfortable reclined position. Compatible with Jeep Wrangler JKU 4-Door model years 2007-2017. Easy installation requires no special tools though a breaker bar or impact gun will make installation easier. Spacers install under rear seat brackets; (4) in front of seat, and (3) in back of seat. Set includes seven matching high grade bolts and washers for installation of front and rear brackets.

Step 1. Starting in the back of the rear seat. Use an 18mm socket and wrench to loosen the bolt (Labeled I in Figure 1) and the two nuts (Labeled H and J in Figure 1). Loosen the bolts but do not remove them completely. This will loosen the seat frame to give you some room to place the spacers in later steps.

Step 2. Next remove the bolts that mount the seat frame to the floor. The four bolts (Labeled A, B, C, D in Figure 1) in the front of the rear seat and the three bolts (Labeled E, F, G in Figure 1) in the back of the rear seat. You may have to raise the seat to access the back bolts. Replacement bolts are provided.

Step 3. Next place the three smaller square spacers under the three rear brackets (Labeled E, F, G in Figure 1) toward the back of the seat. Make sure to align the spacers square to the bracket. Then using a 19mm socket tighten three of the provided replacement bolts and washers to 56ft/lbs. (You may also re-use the factory bolts.)

Step 4. Next place the four larger spacers (Labeled A, B, C, D in Figure 1) under the front brackets of the rear seat. Place the spacer with the bolt hole toward the back. Make sure to align the spacers square to the bracket. Then using a 19mm socket tighten four of the supplied bolts and washers to 56ft/lb.

Step 5. Finally using the 18 mm socket and wrench re-tighten the two nuts and bolt in the back of the seat to 56ft/lbs. Double check all bolts are tightened down and spacers are even and square. Check to make sure seat fold down correctly.

That's it! Enjoy a much more comfortable ride thanks to Ohio Diesel Parts. Please leave us positive feedback if you are happy with our product. And thank you for your purchase!
